

Accessing Your Home Wireless Network

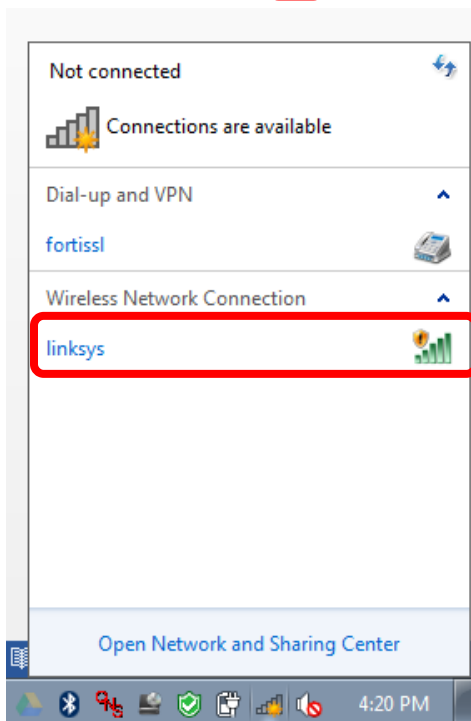

Error Message - After you have logged in, you may see the message "Could not reconnect all network drives." You will see this message because your computer doesn't see the school servers, which you won't be able to access when you are at home. Just X out of the error message and don't worry about it ... you will see the school servers the next time you login at school!

Connecting to a Wireless Network

Click the NETWORK BARS at the bottom right-hand part of your screen to see the wireless networks available. If you do not see any listed, click to OPEN NETWORK AND SHARING CENTER.

Double-click the name of your wireless network and enter the network password (if you have one.) Follow the prompts to connect your laptop and then choose HOME NETWORK if asked.
